Horse Pasture Seed Mix

A standout high quality and persistent blend

- High dry matter potential with excellent palatability
- Features persistent Summer dry tolerant cultivars
- Suitable for new pastures or to renovate existing poor performing paddocks
- Contains no ryegrass or clovers

For more information on
this mix please go to
www.specseed.co.nz

Horses require completely different pastoral requirements from other stock types and this mix reflects these horse specific requirements. The cultivars used in this mix contain no harmful endophytes or clovers making it safe for your horses. Extras e.g. pasture herbs can be added into this mix should you wish, please discuss these options with your retailer.
