Kano Diploid Italian Ryegrass

The high yielding italian ryegrass for strong stock performance.

For more information on
this mix please go to
www.specseed.co.nz

- Kano is a strong growing italian ryegrass with proven high dry matter production, delivering excellent stock performance.
- High disease resistance with rapid regrowth after grazing.
- Contains no harmful endophytes that can cause animal health problems.
- Suitable for most soil types, fertility ranges and stock types.
- Recommended where quality finishing is required as a winter greenfeed and then spring grazing where silage is required.
- Stitch in to pastures that have been winter pugged or affected by summer drought.
