Ribambelle is a new breeding release from Florimond Desprez, first commercially sown in New Zealand in the spring of 2015 where it showed excellent vigour and uniformity. It has a red bulb with a tankard shaped, and from above the bulb is somewhat square shaped. It has green petioles and leaves which have shown good disease tolerance to date.

- New breeding release from Florimond Desprez
- True mono-germ cultivar
- High drymatter percentage (16 – 20%)
- Approximately 40 – 50% of bulb above ground
- Very good resistance to bolting
- Above-ground colour: red
