

**DIPLOID (2N)
ANNUAL
RYEGRASS**

**EARLY
MATURING
TYPE**

**IMPROVED
FORAGE
QUALITY**

it's the complete package!

- ⚙️ Thunder is an early maturing diploid (2N) variety which was bred to provide that consistent, high quality forage
- ⚙️ Excellent resistance to disease, amazing palatability, high digestibility and trial topping dry matter forage yields!
- ⚙️ Early maturity means that Thunder will provide forage at a time during the grazing season when other forage options are at their lowest
- ⚙️ The absolute bonus is that as a Diploid grass, this means Thunder has superior feed quality than the Tetraploid Annuals
